Four levels of filtration

- **HEPA filter**
  2" deep, medical grade for trapping 99.97% of micro-particulates down to 0.3µ.
- **Activated carbon filter**
  Specially blended carbon filter traps up to 400 toxic chemicals found in tobacco smoke.
- **Pre-filter**
  1" tar-trapping pre-filter which works like a cigarette filter.
- **Post-filter**
  Pleated post-filter.

Customize your filtration system by using either a 2" HEPA filter and 15 lbs of activated carbon, or 2 carbon filters of 15 lbs each.

*Recommended filter replacement schedule**

Prefilters, every 3 months
HEPA filter, 1-5 years
Carbon filter, 6 months to 2 yeors.

*Filters life cycle can widely vary with the environment the air purifiers are used in
